Walgreens Respects Your Right To Choose How We Contact You

To help our customers stay current with their prescriptions, the Walgreens Family of Companies sends texts or automated phone calls to customers regarding their prescriptions using phone numbers on the customer’s pharmacy record. We also may provide other health related notifications, offers and reminders.

Some important reasons Walgreens may call or text include:

- Prescriptions delayed
- Need updated insurance information
- Prescription ready for pick up or to be shipped
- Other health related notifications, such as availability of immunizations.

Can we use automation to call or text about your prescriptions and provide other health notifications, offers and reminders?

[No, don't call or text me]  [Yes, allow calls or texts]

Agreement to receive these calls and text messages is not required to purchase goods or services. I am 18 and have the authority to provide consent. I agree that the Walgreens Family of Companies may use automation to call or text phone numbers on my patient record with pharmacy and health care related offers, notifications and reminders.

By providing the information below, you’ll be able to select from a specific list of vaccines the patient can schedule at Walgreens

* Required

Where does the patient want to get vaccinated?

New York, NY 10016, USA

When was the patient born?

* Date of birth

04/28/1996

Walgreens Pharmacy administers applicable vaccinations for children ages three and older. State and age restrictions may apply. Vaccines are subject to availability; certain vaccines may not be available in all stores.
Select up to 4 vaccines

Below are the vaccines the patient can schedule at Walgreens based on their age and location.

CDC says it’s safe to get multiple vaccines at once.

☐ COVID-19
   Stay up to date and get the bivalent booster. CDC recommends a second bivalent booster for adults age 65+ and the immunocompromised.

☐ Shingles (Shingrix)
   Recommended that adults age 50+ get 2 doses, 2-6 months apart. Dose 2 may be scheduled 56 days after receiving dose 1.

☐ Pneumonia
   Recommended for all adults age 65+ and adults age 19-64 with certain health conditions or risk factors.

☐ Tdap (Whooping Cough)

☐ Hepatitis B
